

## MEDIUM special mounting system for interactive presentation solutions

Interactive boards have been used very successfully in teaching and conference rooms for several years. Especially in the educational sector the use of conventional and interactive boards at the same time poses a problem for the user due to organisational and room layout reasons. MEDIUM now offer **the perfect solution with the new special mounting system for interactive presentation systems:**

The new mounting system renders it possible to **integrate interactive boards into a board system** and thus the **convenient simultaneous use**. The optional wing boards are magnetic either for use with **whiteboard** markers on a premium scratch resistant vitreous enamel steel surface or with **chalk**, dry- or moist-erase respectively. Now you have the **invaluable pedagogical functions of the interactive board available anytime**.

The special mounting system is available in the following **versions:**

- **Height adjustable**, but also for stationary wall mounting
- with our without board wings (write-on)
- Optional wings in **white** (to use with whiteboard markers) or **green** (to use with chalk)
- **Ruling** on the board wings available on request
- Optional tilt resistant **mobile stand** with safety wheels and PC storage

- **Mounting arm** to mount the Hitachi Ultra-short throw projector ED-A100 supplied in delivery standard. The detachable, height-adjustable special mounting arm ensures the constant correct positioning of the projector. Alternatively a mount for the Sanyo PLC-XL50 (exchange code no. 1085) and a universal mount (exchange code no. 1086) are available. Please always order additionally, thank you!

## The **advantages** of the new MEDIUM special mounting system:

- **Supports most major brands** like HITACHI, SMART, Promethean, INTERWRITE, Numonics, IntelliBoard etc.;
- suitable for interactive boards up to **78" diagonal** (electric mounting for boards up to 95" diagonal available on request)
- **Modular system** makes it **easy to install** and allows for basic systems to be **upgraded** with special features like a mobile stand, height adjustment etc. later
- **electric version** available on request
- the **hidden spring mechanism** used for the height adjustment allows for a **higher tolerance in weight** of the installed projector (2 kg instead of 200 g only as when mounted on columns). This allows for an **unproblematic replacement of the projector** at a later date if required
- the supplied **boards** are made of premium scratch resistant vitreous white or green enamel steel surface – no cheap foil coating!

## **Overview** of the different versions of the special mounting system:

1) Wall mounted, height adjustable special mount for board and projector, without wings  
e.g. for interactive board 77 " image diagonal,  
approx. 162 x 124 cm

**Code no. 1071**

2) Wall mounted, fixed special mount for board and projector, without wings  
e.g. for interactive board 77 " image diagonal,  
approx. 162 x 124 cm

**Code no. 1066**

3) Wall mounted, fixed special mount for board and projector, with board wings  
e.g. for interactive board 77 " image diagonal,  
approx. 162 x 124 cm

**Boards available in white or green**

Wings exterior **green**

3a) **Code no. 1067** (Inside green)

3b) **Code no. 1068** (Inside white)

Wings exterior **white**

3c) **Code no. 1069** (Inside green)

3d) **Code no. 1070** (Inside white)

4) Wall mounted, height adjustable special mount for board and projector, with board wings e.g. for interactive board 77 " image diagonal, approx. 162 x 124 cm

**Boards available in white or green**

Wings exterior **green**

4a) **Code no. 1072** (Inside green)

4b) **Code no. 1073** (Inside white)

Wings exterior **white**

4c) **Code no. 1074** (Inside green)

4d) **Code no. 1076** (Inside white)

5) Height adjustable special mount for board and projector on mobile stand, without wings e.g. for interactive board 77 " image diagonal, approx. 162 x 124 cm

**Code no. 1079**

6) Height adjustable special mount for board and projector on mobile stand, with board wings e.g. for interactive board 77 " image diagonal, approx. 162 x 124 cm

**Boards available in white or green**

Wings exterior **green**

6a) **Code no. 1080** (Inside green)

6b) **Code no. 1081** (Inside white)

Wings exterior **white**

6c) **Code no. 1082** (Inside green)

6d) **Code no. 1083** (Inside white)
