

Zubehör Digitale Projektoren, Plasma Displays

» **Anti Theft-Protection**

**Anti-theft protection with key system**

With the Medium anti-theft device you can easily attach your projector or your notebook to the steel cable. Just tie the steel cable to a firm object, for example a table-leg and interlock the projector to the steel cable with the help of the lock. The lock fits into any Kensington slot which is positioned at the housing of the projector or notebook. This way the projector is secured and it is also covered by your insurance should someone cut the steel cable. The projectors and notebooks are well protected from any snatch.
